

# MK608BPM Series

## Direct-operated, Pressure Reducing Valves

The MK608BPM series are spring loaded, self actuated, direct-operated, valves. Pressure relief valves are used to protect the system from overpressure.

They are available in 1 up to 10 inches (DN25 through DN250) body sizes. These regulators feature a construction capable of sustaining rugged use and their construction makes them easy to install and to maintain.

### FEATURES
